

The DOCSNAKE 48 FX is not just a backpack, but an extremely flexible rescue system for alpine terrain! All inclusive, but not too big and still a lightweight.

- Main case with a modular system that can be adapted to any requirement. All inside pockets can be fixed, removed, interchanged or expanded and freely placed with our velcro system.
- Safetycase for e. g. avalanche shovel, probe and bivouac.
- Separate, large compartment for private equipment or alternatively for the robust crashproofbox.
- **RAD** Rocksnake **Air Divert** - carrying system.
- Removable, anatomically cut and padded hip-belt, which can be easily and gently adjusted using a pulley system.
- Anatomically cut shoulder straps with chest strap and integrated emergency whistle.
- **IKS** Individual labeling system.
- 2 robust handles, robust enough to attach the backpack on a winch or rope.
- Reflectors for better visibility.
- Additional compartment in the bottom that offers enough space for a defibrillator, a rain cover and a helmet bag.

RAD Rocksnake Air Divert:
The best body contact suspension system to bring the center of gravity as close as possible to the body. Sweating cannot be prevented. We try to reduce the humidity through air-ducting and the use of industry-proven filter material instead of simple foam.

Size: approx. 57x35x29cm, with regular package approx. 58x37x38cm

Weight: approx. 2120g without inside pockets, approx. 3371g incl. 7 inside pockets
