

Our **Vario Velcro System (VKS)** is based on the proven Velcro fastener. With little effort and without tools, any small medical stuff can be attached anywhere, in the **Viper Multilayer** as well as in the **first-aid kits** or **ampoule cases** and **crashproof boxes**. The system is extremely flexible. Every position within the base area can be equipped individually. The entire interior space is fully used according to your own ideas without unused space. A large number of VKS elements in different sizes and shapes enables a very wide range of applications.

 **34 different VKS system parts** can be used individually. Delivery without medical material.

 **Robust and light material:**
Polyester 600, Nylon 420, Duraflex clasps, YKK Zippers

VKS Ampoule holder

Size	Volume/Slots	Colour	Item no.
