

Avalanche bag 55L

The avalanche bag serves as a first aid kit in the event of an avalanche accident and brings the most important equipment for a certain number of people to the scene of the accident.

- The backpack is divided into 6 differently sized inner compartments for 30 red, 30 yellow and 10 blue marking-flags, for 5 probes, for a A4 documentation folder, for 5 avalanche transceiver, for an anchoring system and for 3 avalanche shovels.
- With reflector for better visibility.
- Simple carrying system.
- Two robust shoulder straps that can be hung crosswise to optimize the way of carrying when marking the avalanche cone.
- Roll closure.
- IKS slot.

Size: approx. 74(100)x42x27cm
